

Type WP-UG Work Platform

The WP-UG Work Platform can be manufactured for most quickhitch arrangements. Manufactured in strict accordance with Australian Standards, the WP-UG Work Platform is only suitable for underground operations such as mining etc. to safely perform "Special Tasks" and is suitable for a maximum of two people.

Please note: The actual load capacity of the work platform may be restricted by the load capacity of the telehandler. We recommend checking with your local regulatory authority for special laws covering the use of personnel cages when fitted to telehandlers.

- Safe Working Load: 500 kg
- Load Centre: 700 mm
- Approx. Unit Weight: 500 kg

Type FL-CA Floating Carriage

The FL-CA Floating Carriage is designed for Telehandler and Loader machines fitted with quick hitch arrangement. The tines are pin mounted to "self level" when the machine is operating on uneven ground. Fitted with 125mm x 50mm fork tines with a length of 1200mm.

- Safe Working Load: 4500 kg at 600 mm
- Max Tine Spread: 1200 mm
- Approx. Unit Weight: 400 kg
